

RPX-SMARTCLIENT

ANPR SYSTEMS FOR CAR DEALERSHIPS

RoadPixel are a specialist ANPR hardware manufacturer and a software developer with our own in-house ANPR Application Software. We also manufacture the RoadWolf ANPR camera range.

RPX-SMARTCLIENT is a turnkey system to help you develop a closer working relationship with your VIP clients, making them feel important and helping to build customer loyalty. It also helps your sales team by giving a heads up when a prospective customer arrives.

Benefits of RPX-SMARTCLIENT

- Get closer to your customers
- Meet and greet customers as they arrive
- Reduce VIP customer waiting / check in time
- Improve the overall customer experience
- Improve customer loyalty and increase retention
- Alert sales staff to sales opportunities
- Increase site security

The Customer Experience

RPX-SMARTCLIENT can help improve the customer experience and ensure that customers - especially your VIP customers, go away feeling valued.

With the use of system alerts your reception desk can be notified as soon as a customer arrives on site. VIP customers can be personally welcomed in the car park so that they can be on their way without delay or have a quick coffee with you.

Our systems can also be used to alert Sales / Reception staff to the arrival of a client of interest, either for an appointment or just because we know that their vehicle is approaching the end of its contract term.

Security

Security alerts can be easily set up for different vehicle movements that you might want to know about, e.g. an unwelcome visitor or an unsold vehicle leaving site.
